What's this in variable revolution?

## Revolutions of the year 1848

The wind of revolution was unfolding all Europe

### March Revolution

In Vienna too there has been a revolution once, but  
for a thing like "France is doing it: actual life conditions are painful,  
well then shall we make a revolution?" started the miserable March Revolution

### Sophie

The Archduchesses and Empress that cast away the older Metternich  
Sophie Frederike Dorothea Wilhelmine von Bayern...

Thanks to the uprising of this revolution,  
her preferred was said to be the will of the whole nation.  
At the imperial court she managed to cast away  
the spendthrift, huge-faced Metternich.

Even though she's famous for being an historical undead mother-in-law,  
to tell the truth she's said to have had difficulties in many things

### Metternich

Klemens Wenzel Nepomuk Lothar von Metternich.

The lady-killers, genius of diplomacy, Austrian prime minister (German)  
Metternich was a spendthrift: he gave a wife as a present  
in order to cheer up the daughter of Napoleon (but,  
since he was clever and showed talent also in the field of diplomacy,  
Austria after he was drove out, without knowing who was better  
at doing what, entered in a chaotic situation both up and down

Only one man is gone but everyone get nervous: Austria: it's a great country

Austria's domestic affairs were like this but, at Corfuu,  
it will be decided to start a struggle "to the death" against Italy, in the risk
